

Call Type

Call type defines which Accounting Process/System will be followed for the Port Call.

1. PAS - Collaborate/PAS Accounting (Sync's with PAS)
2. FWA - Fairwater Accounting (No Sync)
3. Non-PAS - No Accounting
4. Test - No Accounting

During the Create Port Call Process selecting the Office will assign the default Call Type for the Port Call. When you select the Primary Principal, the system may change the Call Type if the chosen Principal is set to another Call Type.

The Port Call can have only one Call Type and all Principals (File Types) must be allowed to use that Call Type.
